

October 2020

Did you know the number one reason a chicken stops laying eggs is because of it's diet? A hen needs 20 grams of protein a day and plenty of fresh water. Good thing our ADM egg maker is on sale this month for only \$11.50! We also carry mealworms & other protein filled snacks for your feathered friends! Don't forget to give them some extra light! They need 14-16 hours of daylight, take care of your girls so they provide you with lots of fresh eggs!

You know who else needs more protein this time of year – your beef cattle! Our friends at Purina have their Protein tubs on sale. We carry the 30-13 tubs which are 30% protein & 13% fat, the 38% protein 12% fat and the 24% protein – 10% fat. Which one will work best for you? Call Katie: 320-290-5136 or Kari: 320-630-4786. *Remember, it is easier to build back body condition while it is still warm out than doing it in January or February!

ADM has Dry Cow tubs priced just right! Focusing on a solid dry cow program can really pay dividends over your herds lactation. Call Bryant about your dry cow strategies.: 320-221-4101. Take care of your dairy cows & they'll take care of you!

Looking to learn more about animal nutrition? Check out our website!
